Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary

Application No.

10/730,853

Applicant(s)

MIN ET AL.

Examiner

Quoc D. Tran

Art Unit

2614

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 19 June 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1,8,15,17 and 19-26 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1,8,15,17 and 19-26 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Response to Amendment

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claim 17 is rejected under 35 U.S.C. 102(e) as being anticipated by Lee et al (2003/0054863).

Consider claim 17, Lee et al teach a mobile terminal, comprising a memory unit for storing caller information (Fig. 2); and a radio frequency transmitter for transmitting data including caller information during a voice call over a different channel from a channel for the voice call after a call connection is set up (¶ 0039-0041), *wherein the data includes the caller information (i.e., caller image) and a telephone number of a receiving party (i.e., dialing number) (see ¶ 0033).*

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2614

4. Claims 1, 8, 15 and 19-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Awada et al (6,675,008) in view of Lee et al (2003/0054863).

Consider claims 1 and 8, Awada et al teach a system and method for displaying caller information (abstract), comprising: a caller terminal for storing caller information and transmitting data including the caller information to a service system after a call connection is setup (§ 0009, 0025); a service system for receiving the data including the caller information from the caller terminal and transmitting the data to a receiver terminal (§ 0027, 0036); and the receiver terminal for receiving the data from the service system, storing the caller information to be linked with a telephone number of the caller terminal and displaying the caller information when a paging signal is received (§ 0038, 0043-0044), *wherein the caller information is automatically stored in the receiver terminal by linking a telephone number contained in the data with a telephone number stored in a telephone directory (§ 0034).*

Awada et al did not suggest the RF receiver receives caller ID data over a different channel from the channel for voice call after the call connection set up. However, Lee et al suggested such (§ 0039-0041) for efficiently transmitting image data over the network.

Therefore, it would have been obvious to one of the ordinary skill in the art at the time the invention was made to incorporate the teaching of Lee et al into view of Awada et al for the reason described above.

Consider claim 15, Awada et al teach a mobile terminal (§ 0017), comprising: a radio frequency (RF) receiver for receiving data including caller information during a call (§ 0009); a memory unit for storing the caller information to be linked with a telephone number of a caller terminal (§ 0039); and a controller for controlling a mobile terminal to display the caller

Art Unit: 2614

information when a paging signal is received (§ 0043-0044), *wherein the caller information is automatically stored in the receiver terminal by linking a telephone number contained in the data with a telephone number stored in a telephone directory (§0034).*

Awada et al did not suggest the RF receiver receives caller ID data over a different channel from the channel for voice call after the call connection set up. However, Lee et al suggested such (§ 0039-0041) for efficiently transmitting image data over the network.

Therefore, it would have been obvious to one of the ordinary skill in the art at the time the invention was made to incorporate the teaching of Lee et al into view of Awada et al for the reason described above.

Consider claim 19 and 21, Lee et al teach wherein the caller information is transmitted in the form of a packet (§ 0041).

Consider claims 20 and 22, Lee et al teach wherein the difference channel is a reverse traffic channel (§ 0040).

Consider claims 23 and 25, Lee et al teach wherein the caller information is transmitted in the form of a packet (§ 0041).

Consider claims 24 and 26, Lee et al teach wherein the difference channel is a reverse traffic channel (§ 0040).

5. Claim 17 is rejected under 35 U.S.C. 103(a) as being unpatentable over Awada et al (2002/0126814) in view of Lee et al (2003/0054863).

Consider claim 17, Awada et al teach a mobile terminal, comprising a memory unit for storing caller information (§ 009, 0025); and a radio frequency transmitter for transmitting data including caller information during a voice call (§ 0009), wherein the data includes the caller

Art Unit: 2614

information (i.e., caller name, address, email address, etc.) and a telephone number of a receiving party (i.e., dialing number or called party identifier) (§ 0010, 0025).

Awada et al did not suggest transmitting over a different channel from the channel for voice call after the call connection set up. However, Lee et al suggested such (§ 0039-0041) for efficiently transmitting image data over the network.

Therefore, it would have been obvious to one of the ordinary skill in the art at the time the invention was made to incorporate the teaching of Lee et al into view of Awada et al for the reason described above.

Response to Arguments

6. Applicant's arguments with respect to claim 1, 8, 15, 17 and 19-26 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

8. Any response to this action should be mailed to:

Mail Stop ____ (explanation, e.g., Amendment or After-final, etc.)

Commissioner for Patents

P.O. Box 1450

Alexandria, VA 22313-1450

Facsimile responses should be faxed to:

(571) 273-8300

Hand-delivered responses should be brought to:

Customer Service Window

Randolph Building

401 Dulany Street

Alexandria, VA 22314
